

Setting up Voicemail for End Users on our Metaswitch

When setting up voicemail for an end-user on our Metaswitch:

- VFZOP is the only voicemail USOC available on our Metaswitch. And you don't need to add forwarding or the message pad, both are built in.

Voicemail access and access numbers:

- From the home phone on the Metaswitch = *99
- Away from home (they can use the toll free number or the point to number):
 - ME = 866-666-7289 (207-435-6245)
 - NH = 866-670-7512 (603-225-6245)
 - VT = 866-670-7514 (802-241-6245)
 - Or as with the Legacy switch the end-user can call their home phone and hit the * to access their voicemail
